

Nicolas ROUGERIE  
19, rue des Racny  
69 003 Lyon  
Phone: (+33) 6 22 87 54 86  
Email: [nicolas.rougerie@lpmmc.cnrs.fr](mailto:nicolas.rougerie@lpmmc.cnrs.fr)

Date of birth: April 28 1985  
(31 year old)  
Nationality: french

## Positions held

---

<b>2011- ...</b>	<b>LABORATOIRE DE PHYSIQUE ET MODÉLISATION DES MILIEUX CONDENSÉS CNRS AND UNIVERSITÉ GRENOBLE 1.</b> Chargé de Recherche (Researcher) CNRS.
<b>2010-2011</b>	<b>LABORATOIRE ANALYSE, GÉOMÉTRIE ET MODÉLISATION CNRS AND UNIVERSITÉ DE CERGY-PONTOISE.</b> Post-Doctoral associate. Advisor: Mathieu Lewin, ERC project MNIQS.
<b>2007-2010</b>	<b>LABORATOIRE JACQUES-LOUIS LIONS UNIVERSITÉ PIERRE ET MARIE CURIE.</b> Graduate student. Advisors: Xavier Blanc and Sylvia Serfaty.

## Formation

---

<b>2007 – 2010</b>	<b>LABORATOIRE JACQUES-LOUIS LIONS</b> , Université Pierre et Marie Curie. PHD in Mathematics. Advisors : Xavier Blanc and Sylvia Serfaty. Subject : Gross-Pitaevskii theory for rotating Bose-Einstein condensates : vortices and phase transitions. Defended December 9, 2010.
<b>2006 – 2007</b>	<b>ÉCOLE NATIONALE SUPÉRIEURE DES MINES DE NANCY UNIVERSITÉ PIERRE ET MARIE CURIE - PARIS 6.</b> French Engineer Diploma: “Ingénieur Civil des Mines”. Master degree, Numerical Analysis and Partial Differential Equations.
<b>2004 – 2006</b>	<b>ÉCOLE NATIONALE SUPÉRIEURE DES MINES DE NANCY UNIVERSITÉ HENRI POINCARÉ - NANCY 1.</b> Engineering studies. Master studies in Mathematics.

## Distinctions

---

- 2015: Young Scientist Prize awarded by the International Union of Pure and Applied Physics
- 2014: Cours Peccot at the “Collège de France”
- 2010: Rosemont-Demassieux Prize, delivered by the “Chancellerie des Universités de Paris”

## Responsabilities

---

- Principal Investigator of the ANR project Mathostaq, “Mathematical methods for the many-body problem in statistical and quantum mechanics”, 2013-2016
- Principal Investigator of the PEPS-PTI project (CNRS) “Méthodes mathématiques pour la physique des atomes froids”, 2013
- Principal Investigator of the PEPS-PTI project (CNRS) “Many-body quantum mechanics and cold atoms”, 2012

## Publications

---

This list follows the anti-chronological order of the preprints. To access full texts:

## Talks

---

- *Rigidity of the Laughlin liquid*, “Mathematical results in quantum physics”, Qmath13 , Atlanta, October 2016
- *Emergent anyons in quantum Hall physics*, Many-Body theory and effective equations, Oberwolfach, September 2016
- *Structure of large bosonic systems : de Finetti theorems and applications*, Institute for Analysis und Algebra, Technische Universität Braunschweig, September 2016
- *Localized regime for mean-field bosons in a double-well potential*, Conference on Methods of Modern Mathematical Physics, Toronto, August 2016
- *Emergent anyons in quantum Hall physics*, EMS-IAMP Summer School in Mathematical Physics, Rome, July 2016
- *Mean-field and dilute limits for large bosonic systems: the use of quantum de Finetti theorems*, Spectral and scattering theories in Quantum Field Theory, Porquerolles, May 2016
- *Incompressibility estimates for the Laughlin phase*, Mathematical Physics seminar, Bristol, April 2016
- *Emergent anyons in quantum Hall physics*, conference Spectral Theory of Novel Materials, CIRM, Marseille, April 2016
- *Effets de courbure en supraconductivité de surface*, séminaire Physique Mathématique, Institut Fourier, Grenoble, March 2016

- *Derivation of non-linear Gibbs measures from many-body quantum mechanics*, séminaire Physique Mathématique, Université Lyon 1, January 2016
- *The surface superconductivity regime in Ginzburg-Landau theory*, Workshop “Superconductivity, superfluidity, vortices”, Paris, October 2015
- *The surface superconductivity regime in Ginzburg-Landau theory*, invited talk, 18th International Congress on Mathematical Physics, Santiago de Chili, July 2015
- *Derivation of non-linear Gibbs measures from many-body quantum mechanics*, invited talk, 18th International Congress on Mathematical Physics, Santiago de Chili, July 2015
- *Incompressibility estimates for the Laughlin phase*, program “Quantum Many-Body Systems, Random Matrices, and Disorder”, ESI, Vienna, June 2015
- *The Ginzburg-Landau model in the surface superconductivity regime*, workshop “Semiclassical Analysis and Magnetic Fields”, Rennes, May 2015
- *Structure of large bosonic systems: around the quantum de Finetti theorem*, Technische Universität München, April 2015
- *De Finetti theorems, mean-field limits and Bose-Einstein condensation*, course at the Ludwig-Maximilian Universität, Munich, April 2015
- *Incompressibility estimates for the Laughlin phase*, “Le monde quantique” Trimester , IHES, Mars 2015
- *Classical Coulomb gases: mean-field approximation and beyond*, Applied Analysis Seminar, Université d’Aix-Marseille, January 2015
- *Questions around Bose-Einstein condensation*, Physics Colloquium, ENS Lyon, January 2015
- *Classical Coulomb gases: mean-field approximation and beyond*, Mathematical Physics Seminar, Université de Genève, December 2014
- *Derivation of non-linear Gibbs measures from many-body quantum mechanics*, X-EDP Seminar, November 2014
- *Incompressibility estimates for the Laughlin phase*, University Rome 3, November 2014
- *Méthodes mathématiques pour la physique des atomes froids*, Colloque physique théorique et ses interfaces, Paris, November 2014
- *The Ginzburg-Landau model in the surface superconductivity regime*, Analysis Seminar, University of Zürich, October 2014
- *On the derivation of non-linear Schrödinger functionals for trapped Bose gases*, conference “Selected Problems in Mathematical Physics”, La Spezia, Italy, September 2014
- *Derivation of non-linear Schrödinger models based on the structure of bosonic states*, workshop “Effective equations in Mathematical Physics”, Institut Mittag-Leffler, Stockholm, June 2014
- *The Ginzburg-Landau model in the surface superconductivity regime*, seminar “Problèmes Spectraux en Physique Mathématique”, Institut Henri Poincaré, Paris, May 2014
- *Incompressibility estimates for the Laughlin phase*, workshop “Theoretical and Numerical Aspects of Quantum Transport”, Aalborg, Denmark, April 2014
- *Théorèmes de de Finetti, limites de champ moyen et condensation de Bose-Einstein*, cours Peccot at the Collège de France, Paris, February-March 2014
- *Classical Coulomb gases beyond mean-field theory*, Paris-London Analysis Seminar, Paris, December 2013
- *L’équation de Hartree et le théorème de de Finetti*, Séminaire Analyse Numérique et EDPs, Orsay, November 2013
- *Structure of large bosonic systems: the mean-field approximation and the quantum de Finetti theorem*, Mathematical physics seminar, Princeton University, November 2013
- *Bose-Einstein condensation of interacting particles and the quantum de Finetti theorem*, Philippe Nozières Seminar on Theoretical Physics, Grenoble, October 2013
- *Structure of large bosonic systems: the mean-field approximation and the quantum de Finetti theorem*, Conference “Mathematical Horizons for Quantum Physics 2”, National University of Singapore, September 2013

- *Mean-field bosonic systems and the quantum de Finetti theorem*, Conference “Mathematical properties of large quantum systems”, Institut Henri Poincaré, Paris, June 2013
- *Mean-field classical Coulomb systems and the renormalized jellium energy*, Warwick Statistical Mechanics Seminar, Warwick University, May 2013
- *Quantum Hall states and plasma analogy in rotating trapped Bose gases*, Maths-Physics Young Researchers Meeting, Institut Henri Poincaré, Paris, April 2013
- *Quantum Hall states and plasma analogy in rotating trapped Bose gases*, Institute for Theoretical Physics, ETH Zürich, March 2013
- *Sur la modélisation de l’interaction entre polarons et cristaux quantiques*, Laurent Schwartz Seminar, Ecole Polytechnique, December 2012
- *Quantum Hall states and plasma analogy in rotating trapped Bose gases*, Institut Fourier, Grenoble, November 2012
- *Inhomogeneous Vortex Patterns in Rotating Bose-Einstein Condensates*, Young Researcher Symposium, 17th International Congress on Mathematical Physics (ICMP12), Aalborg, Denmark, August 2012
- *On the binding of polarons in a mean-field quantum crystal*, Collège de France, Paris, May 2012
- *Dérivation de la théorie de Pekar du polaron à partir d’un modèle de cristal quantique*, Laboratoire Jacques-Louis Lions, Paris, January 2012
- *Around the third critical speed in Gross-Pitaevskii theory*, Conference “Multiscale Modeling, Simulation, Analysis and Applications”, National University of Singapore, December 2011
- *On the third critical speed in Gross-Pitaevskii theory*, Journées Lions-Magenes, Laboratoire Jacques-Louis Lions, Paris, December 2011
- *Derivation of Pekar’s polarons from a microscopic model of quantum crystals*, Universita di Roma Tre, Rome, November 2011
- *Derivation of Pekar’s polarons from a microscopic model of quantum crystals*, Laboratoire Paul Painlevé, Lille, November 2011
- *Un modèle de petit polaron et sa limite macroscopique*, meeting ANR Ardypiteq, IRMAR, Rennes, November 2011
- *Cristaux quantiques et modèles pour le polaron*, meeting ANR NoNap, Institut Henri Poincaré, October 2011
- *Gross-Pitaevskii Theory in a Flat Trap: the Third Critical Speed*, Conference “Superconductivity, Bose-Einstein Condensation and Liquid Crystals”, Aarhus, Denmark, June 2011
- *Cristaux quantiques et modèles pour le polaron*, IRMAR, Rennes, June 2011
- *Sur les vitesses critiques en théorie de Gross-Pitaevskii*, Numerical Analysis and PDEs seminar, Orsay, April 2011
- *Théorie de Gross-Pitaevskii pour des superfluides en rotation*, Mathematical Physics seminar, Institut Fourier, Grenoble, April 2011
- *Vortex géants et cercles de vortex dans un condensat de Bose-Einstein en rotation rapide*, Laboratoire de Physique Théorique et Modèles Statistiques, Orsay, April 2011
- *La troisième vitesse critique en théorie de Gross-Pitaevskii*, Institut Élie Cartan, Nancy, April 2011
- *Quelques résultats mathématiques sur les condensats de Bose-Einstein en rotation rapide*, Laboratoire de Physique et Modélisation des Milieux Condensés, Grenoble, March 2011
- *Sur les vitesses critiques en théorie de Gross-Pitaevskii*, Laboratoire de Mathématiques et Applications, Metz, February 2011
- *Around the third critical speed in Gross-Pitaevskii theory*, Troisième rencontre du GDR Dynamique Quantique, Orléans, February 2011
- *Quelques résultats mathématiques sur les condensats de Bose-Einstein en rotation*, Laboratoire de Physique des Lasers, Université Paris 13, January 2011
- *Around the third critical speed in Gross-Pitaevskii theory*, Université d’Aarhus, Denmark, November 2010

- *Around the third critical speed in Gross-Pitaevskii theory*, journée du projet ATHENA, FRUMAM, Marseille, November 2010
- *Autour de la troisième vitesse critique en théorie de Gross-Pitaevskii*, Students seminar, Mathematics Department, Université de Cergy-Pontoise, October 2010
- *Bose-Einstein condensates : extreme rotation regimes and giant vortices*, Analysis seminar, Université Paris 6 – ENS Ulm, April 2010
- *Giant vortex for a Bose-Einstein condensate in rapid rotation*, Transatlantic seminar, Université Paris 6 – Brown University, December 2009
- *Extreme rotation regimes for a Bose-Einstein condensate*, Erwin Schrödinger Institute for Mathematical Physics, Vienna, June 2009
- *Rotation ultra-rapide d'un condensat de Bose-Einstein*, Spectral Theory and Mathematical Physics seminar, Université Paris 11, Orsay, March 2009
- *Rotation ultra-rapide d'un condensat de Bose-Einstein*, Students' seminar “Numerical Analysis and PDEs”, Université Paris 11, Orsay, January 2009
- *Rotation ultra-rapide d'un condensat de Bose-Einstein*, Laboratoire Jacques-Louis Lions, October 2008

## Popularizing work

---

- *L'Equation du millénaire*, comic book in collaboration with Gaël Octavia and Camille Bouvard, published by the “Fondation Science Mathématique de Paris”: <http://www.sciencesmaths-paris.fr/fr/bd-462.htm>
